
Software Release Notes

Solaria Interrogator Viewer Main Software v3.0.0 (1)

Solaria Interrogator Viewer Main Software v3.0.0 (1) replaces Solaria Interrogator Viewer Main Software V2.0.0 (18).

Affected products

- Christie CP2210, CP2215, CP2220 and CP2230
- Christie CP4220 and CP4230
- Christie Solaria One and Solaria One+
- Christie D4K25 and D4K35
- Christie CP42LH

Prerequisites

- Microsoft .NET Framework 2.0 or higher

New features and enhancements

- Christie IMB-S2 log files can now be imported and examined.
- The user interface has been updated to make the application easier to use.
- The new Examiner utility searches logs for the most common problems and provides recommended solutions.
- The new **Preference** menu allows you to select Microsoft WordPad as your default text editor.
- When multiple rows in a log file are highlighted, you can now move forward or backward from one row to the next.
- The System Snap Shot utility now provides Christie IMB-S2 information.
- You can now drag and drop multiple interrogator files into the main window from your desktop or your email application.
- **Highlight** and **Unhighlight** options have been added to the **Edit** menu.
- To make sure the Examiner utility remains current, you can upload new issues lists from the Christie website.
- A File Load Progress dialog showing the progress of the file import now appears when opening log files.

Corrected issues

- Checkboxes have been removed from the parent categories in the **Enable Filtering** pane.
- Temporary files are now removed when you open a log file.
- The DateFilter dialog now appears as expected when the **Date** checkbox is selected in the **Enable Filtering** pane.
- When **Cancel** is selected in the DateFilter dialog, the **Date** checkbox is automatically cleared in the **Enable Filtering** pane.
- When a log file is opened for the first time, the mouse scroll wheel now works as expected.
- Log files containing dates now open as expected.

Known issues

- When viewing Christie IMB-S2 log files, functionality is currently limited to these options:
 - Filtering
 - Searching
 - Navigation (Previous and Next)
 - Highlight, Unhighlight, Unhighlight all rows
 - Preferences
 - Additional Files
 - All **Edit** menu options
 - All **File** menu options
 - Row resizing

Complete functionality will be available in the next release.
